PROJECTS

Food Delivery Web Application [🔗](#) | Spring Boot, MySQL, React.js, REST APIs, Material UI, Git

- Developed a Java Spring Boot based full-stack food delivery application using React.js and MySQL.
- Built REST APIs for restaurant listing, cart management, order placement, and billing.
- Implemented authentication and modular frontend-backend integration.

Expense Tracker REST API Backend [🔗](#) | Java, Spring Boot

- Developed a Java Spring Boot backend application implementing CRUD operations, layered architecture, authentication, and database integration.
- Designed REST endpoints for expense creation, category management, and transaction retrieval.
- Applied layered architecture using Controller, Service, Repository, and Entity design patterns.
- Integrated authentication and authorization mechanisms.

HACKATHON EXPERIENCE

WeMakeDevs Hackathon

Nov 2025

Participant

- Developed backend API services and workflow automation components in a collaborative hackathon project.
- Built full-stack automation workflows in a hackathon environment.

CERTIFICATIONS

- Oracle Certified Generative AI Professional
- Java - Spoken Tutorial Project, IIT Bombay
